

TRF

(formerly Transport and Road Research laboratory (TRRL))

TRF self funded research 2007-2008

The programme of TRF self funded research for the financial year 2007-2008 comprises the following six projects, of which four are planned continuations of projects which started in or before 2006-2007, and two are new.

- 1 Investigation of the characteristics of vehicles producing excessive noise and ground-borne vibration (continuation from 2006-2007).
- 2 Contactless microtexture assessment for road surfaces (continuation).
- 3 automated inspection of highway structures (continuation).
- 4 Measurement of layer thickness.
- 5 Interpretation of the falling weight deflectometer data in relation to defects in pavements (continuation).
- 6 Research into active/adaptive vehicle structures.
